## Technical Specifications: Apollo G Series Doors

- Perimeter frame made of Pine Finger Joint, which reduces the risk of warping.
- Filled with Honeycomb or Bee Panel.
- Filled with tubular chipboard panel (Sauerland), providing 30 dB sound insulation and 15-minute fire resistance.
- Filled with EPS (Expanded Polystyrene) sheet, ensuring acoustic reduction.
- Frame made of moisture-resistant material with the option of weatherstripping or rubber seal to improve airtightness and reduce sound.
- Jambs and moldings in moisture-resistant material shaped like an “L” to wrap the wall opening, covering the entire perimeter where the door will be installed.
- Surface finish of door, frames, and moldings in Polypropylene, PVC, or CPL in solid or wood-effect colors.
- American or European-type lock.
- Optional custom glass design available upon client request, subject to factory verification.
